

Launching of CIEX (TRON) Token

Dear Users,

Due to the increasing congestion of the Ethereum network and the long-term development of CIEX, we are hereby introducing a new token to improve transaction speed and the user experience. After objectively evaluating the security, performance, speed and other criteria of the TRON network, we finally selected TRON as the public blockchain of the CIEX token – CIEX (TRON) and will be launched on June 10, 2020.

A 90 days conversion period for investors to converting the CIEX (ERC-20) to CIEX (TRON) will be provided as from June 10, 2020. Those who have not complete the conversion within the said period above shall be deemed to voluntarily give up their right of conversion. In order to allow investors to smoothly transit from CIEX (ERC-20) to CIEX (TRON), the two types of CIEX token will coexist on the CIEX Digital Asset Exchange Platform, while CIEX (ERC-20) / CIEX (TRON) can be traded freely for a period of one year until June 9, 2021. At that time, CIEX (ERC-20) will be permanently removed from the CIEX Digital Asset Exchange Platform.

Simultaneously with the start of the conversion period, the minimum price limit of CIEX (ERC-20) in Crypto-to-Crypto will be cancelled which means that all investors can trade the token below 0.01 USDT. Conversely, the minimum price limit will be applied for CIEX (TRON) which means that no investor can trade the token below 0.01 USDT. The minimum price limit may be adjusted according to the actual market conditions.

The total circulation of CIEX (TRON) will be maintained at 10 billion as same as the CIEX (ERC-20). All CIEX (ERC-20) are allowed to convert to CIEX (TRON) at a 1:1 ratio. The recovered CIEX (ERC-20) will be destroyed and will no longer be circulated in the market to protect the rights and interests of investors. The converted CIEX (TRON) will be placed as frozen, all investors are compulsory to purchase the CIEX (TRON) in exchange platform for unfreezing the converted tokens. Each purchase of 1 CIEX (TRON) will release 0.3, and the daily limit is 1% of the total conversion amount. The releasing ratio may be adjusted depending on the actual market conditions. The freezing condition is not inapplicable to new investors.

Thank you for your kind attention.

CIEX Team
